Aprendizaje en movimiento

# Movement Stimulates The Mind

Today's classroom is an active, dynamic place where students are often given room to move – empowering them with choices of where to sit, how to sit and even when to sit. All to keep them more engaged, comfortable and productive.

Virco supports the flexible learning environment with furniture that allows easy transition from lecture to hands-on practice, from collaborative projects to independent time for reading, research or introspection. And we know bodies are built for motion, for wiggling and twisting, bouncing and sometimes even rocking. That's why our healthy movement collections offer ergonomic seating that flexes and rocks, chairs that roll and swivel and tables and desks that adjust from sitting to stand-up height and can work alone or nest together – all designed to move with ease and help students find the position and space where they work best.

Our products work together to help set the stage for an active, flexible classroom. Each piece integrates with popular Virco classroom lines and is built with the legendary Virco durability that has made our products the classroom standard since 1950.

Go ahead, give  
your students a little

room to  
move!

# Seating From The Floor Up

Virco leads the way in healthy movement for the classroom with a lineup of seating that meets students wherever they sit.

**Rocker**  
*Fun and focused*

**Floor Rocker**  
*Rocking it on ground level*

**Mobile 4-legged Seating**  
*Easy movement around your space*

**C2M Seating**  
*Choose to move - or not*

**R2M Seating**  
*Move your way*

**Lab & Task Seating**  
*Rise and lower to the task*

# Room to Move<sup>®</sup>

Customize the classroom with desks and chairs that rise or lower for the task. Pair high-rising desks with stools, lab chairs or chairs that roll – or eliminate the chairs altogether for standing workstations to keep learning active. With Virco's adjustable-height desks, you can create an environment that serves your goals and easily transforms as lesson plans require.

Mix and match seat and desk heights to create stadium seating. Students can choose what works best, so everyone gets the best seat in the house.

## **Choose Where You Work Best**

*Standing at the workstation offers the health benefits associated with active seating – and just may be how your students work best.*

# Room to Move<sup>®</sup>

Depending on the task, sitting low to the ground may just be what's needed to create a comfortable and effective learning environment. We've taken this idea and rocked it with a compelling and versatile complement to the classroom that meets kids on their level.

Our **Floor Rockers** feature the popular ZUMA<sup>®</sup>, Sage<sup>™</sup> or Analogy<sup>®</sup> seat atop a sturdy, one-piece rocking base with a non-marring pad for smooth movement. With subtle back-and-forth motion, Floor Rockers encourage healthy sitting and offer the ergonomic benefits of our standard rockers. A convenient handhold makes the Floor Rocker easy to reposition as needed.

Floor Rockers work great for group interaction, as well as individual reading and study. Pair them with floor tables for a new take on flexible seating.

# DOWN

### **Low to the Ground**

*Floor tables are height-adjustable from 14 1/4" – 22 1/4" inches. Pair them with floor mats, pillows or the Floor Rocker to create seating that's comfortable and inviting.*

# Room to Move<sup>®</sup>

Enabling students and teachers to easily transition from sitting to standing throughout the day provides the ultimate flexibility. With a sleek design and versatile functionality, the **Room to Move Series Sit-to-Stand Workstations** feature a smooth up and down pneumatic height adjustment allowing students and teachers to move with ease for a more productive and engaging learning environment.

A spacious work surface provides ample space, while storage options such as a center drawer or tote tray allows papers and notebooks to be stored, keeping personal belongings neatly concealed. Casters offer smooth mobility throughout the classroom, while front-locking casters ensure the workstation stays put when needed.

## ***Sit to Stand on Demand***

*An easy-to-use pneumatic lever offers a height adjustment range of 29" to 42" empowering users to sit or stand at any time throughout the day.*

# Room to Move<sup>®</sup>

The body and mind are designed for dynamic movement. When rockers are in the house, the combination of gentle movement and flexible support help children channel excess energy into classroom endeavors. The controlled back-and-forth motion helps the body settle down so the mind can tune in.

Our **Rocker** is available in the popular ZUMA<sup>®</sup>, Sage<sup>™</sup> and Analogy<sup>®</sup> lines. Ergonomically designed with gentle, flexible support, Rockers encourage healthy movement and a moderate range of motion. Perfect for classrooms, libraries and other educational environments, these chairs can help turn disruptive fidgeting into healthy movement through the power of rocking.

# BACK & FORTH

#### **Rock It**

*As kids with learning and attention challenges are participating in standard classrooms at all levels, educators find that rocking chairs can help improve focus and attention span, reduce fidgeting and increase participation and engagement.*

# Room to Move<sup>®</sup>

A surprising take on active seating, the **R2M (Room to Move) Mobile Task Chair** moves with you to help activate your best sitting position. With an ergonomic seat secured by four air coils that flex and compress as you move, the R2M Mobile Task Chair provides controlled movement in all directions from front-to-back, side-to-side and in-between. Available in the popular ZUMA<sup>®</sup>, Sage<sup>™</sup> and Analogy<sup>®</sup> families, R2M Mobile Task Chair is height-adjustable, with a full-swivel seat and dual-wheel, swivel casters.

It's a perfect solution for a day of active learning - empowering students to move their way.

# SIDE<sub>to</sub>SIDE

# Room to Move<sup>®</sup>

Designed with the idea that sometimes kids need to move and sometimes they don't, the **C2M (Choose to Move) 4-Leg Chair** offers the ultimate choice in active, flexible seating with its unique, patent-pending mode selector. In active mode, the C2M Chair allows controlled 360-degree movement with air coils that flex and compress as you move from side-to-side or back-and-forth, letting students shift and adjust to their most comfortable position. When conventional seating is more appropriate, a simple twist transforms the chair into an ergonomic, fixed position. In motion or not – it's your choice.

Available in ZUMA<sup>®</sup>, Sage<sup>™</sup> and Analogy<sup>®</sup> families, C2M Chairs support inclusive design for blended learning environments.

or **NOT** to **MOVE**

#### **New Dimensions**

*Two chairs in one: a flexible option for dynamic classroom settings.*

# Room to Move®

Transform the classroom with seating that moves with the task. Nearly every Virco series offers a **task chair** that adjusts in height, swivels 360 degrees and rolls freely about the classroom – a comfortable foundation for healthy movement.

Our **lab chairs** provide a range of motion fit for a variety of learning activities, rising to a 27-inch seat height to pair with lab tables, and lowering at the touch of a lever.

Students in a range of heights find the adjustable-height chrome footring key to the lab chair's unique versatility. Workspace on the high-side? Raise the seat and adjust the ring too, for a stable and comfortable seating posture.

## **Free Flowing**

*Move from here to there and everywhere, without ever leaving your seat. Dual-wheel, hooded, swivel casters allow free movement about the classroom.*

AROUND & AROUND

# Room to Move®

A change of perspective may be just what's needed to spark creative thinking. Our Activity Tables and Collaborative Desks are quick to adapt to active learning environments and support a range of configurations that inspire dynamic classrooms.

With innovative and complementary designs that conveniently nest for project-based learning, tables and desks can easily be regrouped into new patterns and rows for collaborative or independent learning. Expand flexibility with casters or glides, and fixed or adjustable-height legs, to configure any space and make rearranging hassle free.

# AROUND<sub>the</sub> room

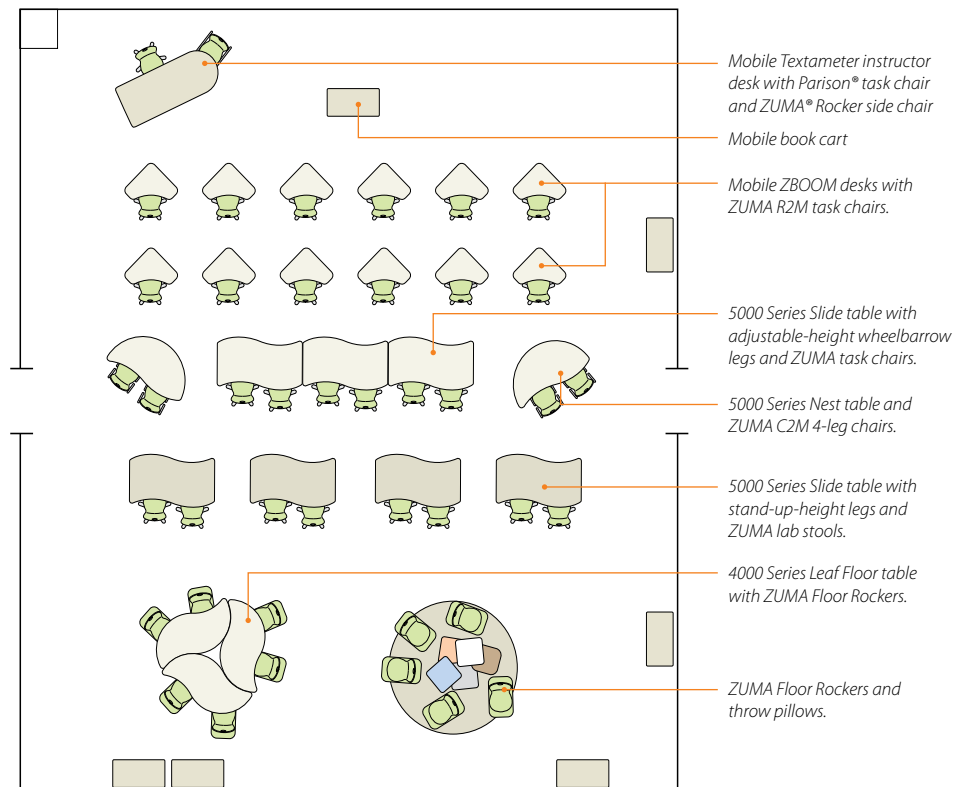

### **The Wheelbarrow Configuration**

*Two legs with casters and two with glides help you move tables easily without losing the stability of a standard table.*

# With Room to Move,<sup>®</sup> Try Moving the Room

Our Room to Move Collection opens up the classroom to new possibilities for educators and students alike. Flexible, ergonomic furniture is designed to be reconfigurable and adaptable to your space, enabling choices that empower every learner. Students can move around the room to find a place where they work best, even if that place changes throughout the day or by activity. What's right for one student, may not be right for all, but with a comprehensive line of similarly styled furniture, no one stands out.

And when moving around the classroom isn't enough, try moving the classroom around. Easily transition from different classroom setups to support a truly dynamic learning environment.

# Discussion Group

5000 Series adjustable-height Slide tables with wheelbarrow legs and ZUMA mobile task chairs and 5000 Series fixed-height Nest tables with ZUMA C2M 4-leg chairs.
